

gDoc Binder Platform

Flexible, extendable,
dependable.

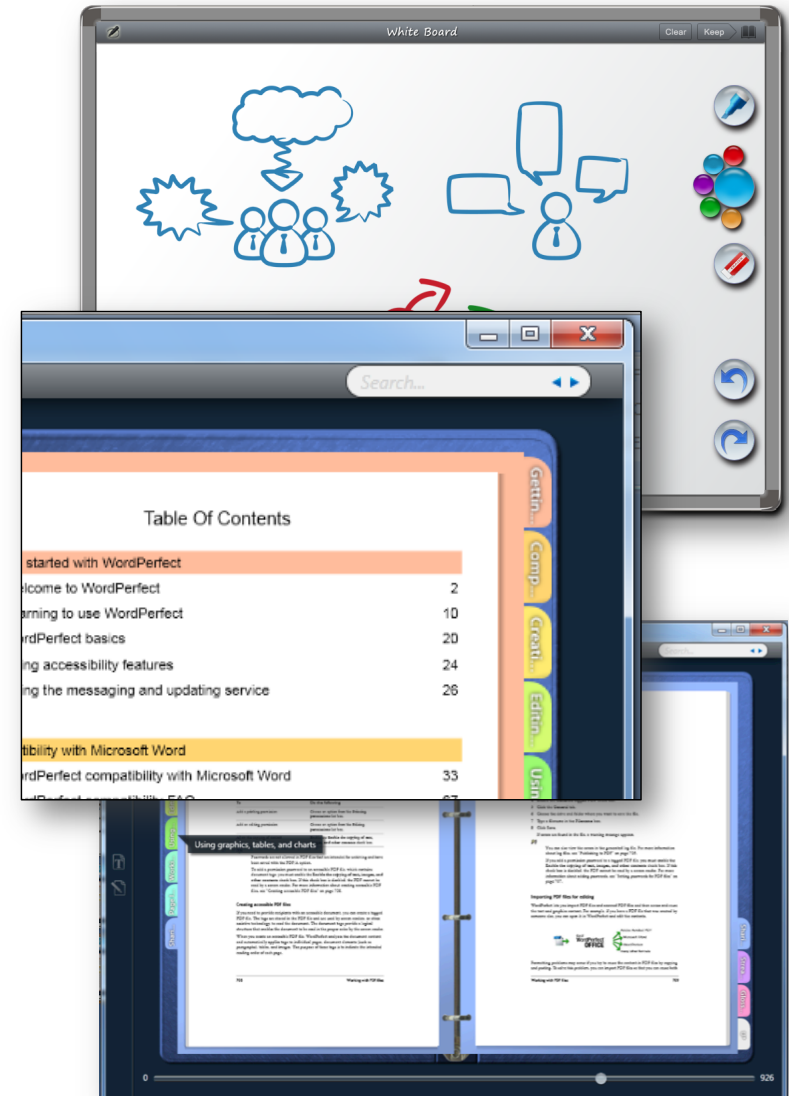

Market problems

- Software vendors are being driven to bring world class software into rapidly evolving markets while reducing time to market, cost and risk.
- Great user experiences are becoming the key to realizing strong returns on investment for information systems.
- Information on a single subject is often fragmented into multiple remote locations and document types.
- There is a need to assemble information into a single, subject-focused mobile view relevant to the user.

gDoc Binder platform

- Simple, instantly familiar interface provides an engaging user experience
- Strong standards adherence allows for high-quality document rendering with support for most common file types
- Variety of APIs and connectors allows for rapid time-to-market
- One platform, many applications. Providing market flexibility while reducing risk and cost.

Global Graphics Software unique competencies
