

# PDF CREATION

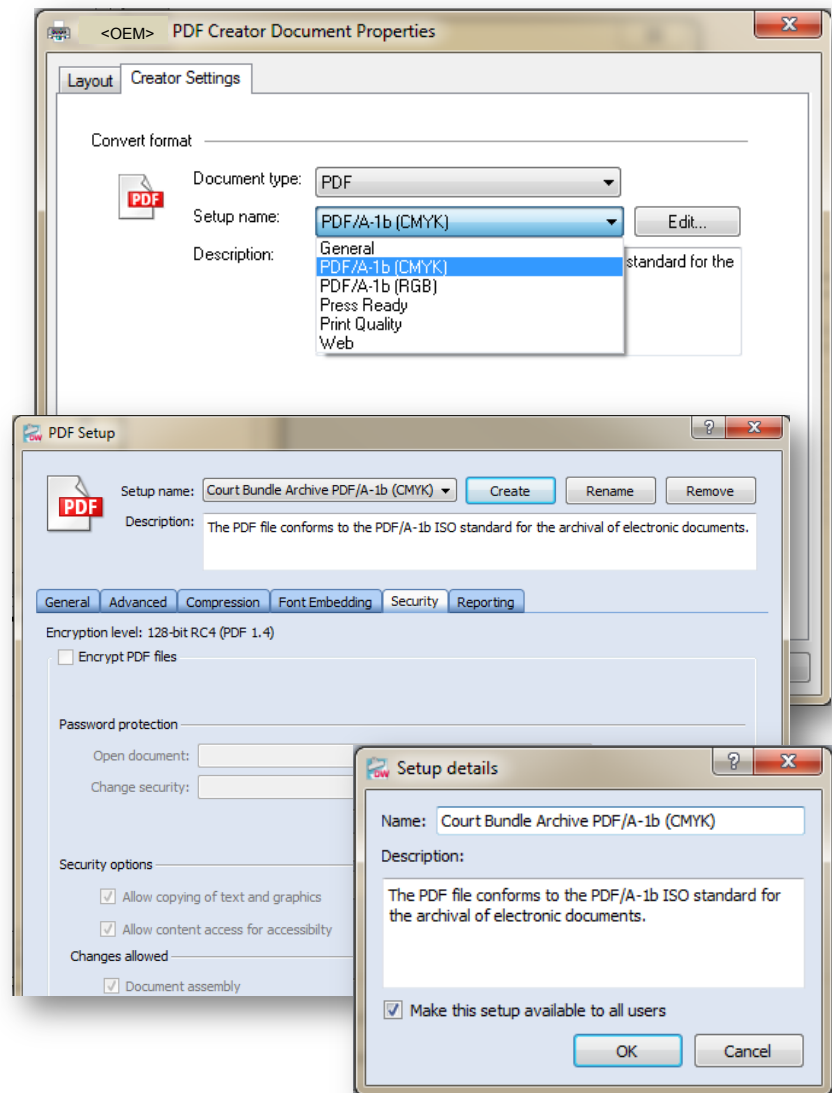

# Market Challenges

- Adding PDF generation capabilities to an application requires significant domain knowledge
  - PDF is the most successful format for sharing documents
  - there are ~750 million PDF documents on the web alone
- Software vendors are being driven to bring world class software into rapidly evolving markets while reducing time to market, cost and risk
- The challenge is to create PDF documents without sacrificing quality, performance or file size

# gDoc PDF Creator

- Adds high-quality PDF and XPS printer driver to almost any application
- Verified as faster, more efficient & higher image quality than competitors
- Created by long-term experts in the field including heads of PDF standards organizations

# Global Graphics distinctive competencies

## Features

## Benefits

Quickly create documents in PDF 1.4-1.7, PDF/A

Accurate document conversion while complying with PDF standards

Support for 128-bit encryption

Apply security during PDF conversion to protect the contents

Unicode support

Internationalization includes localization; already translated into 7 languages

High fidelity conversion

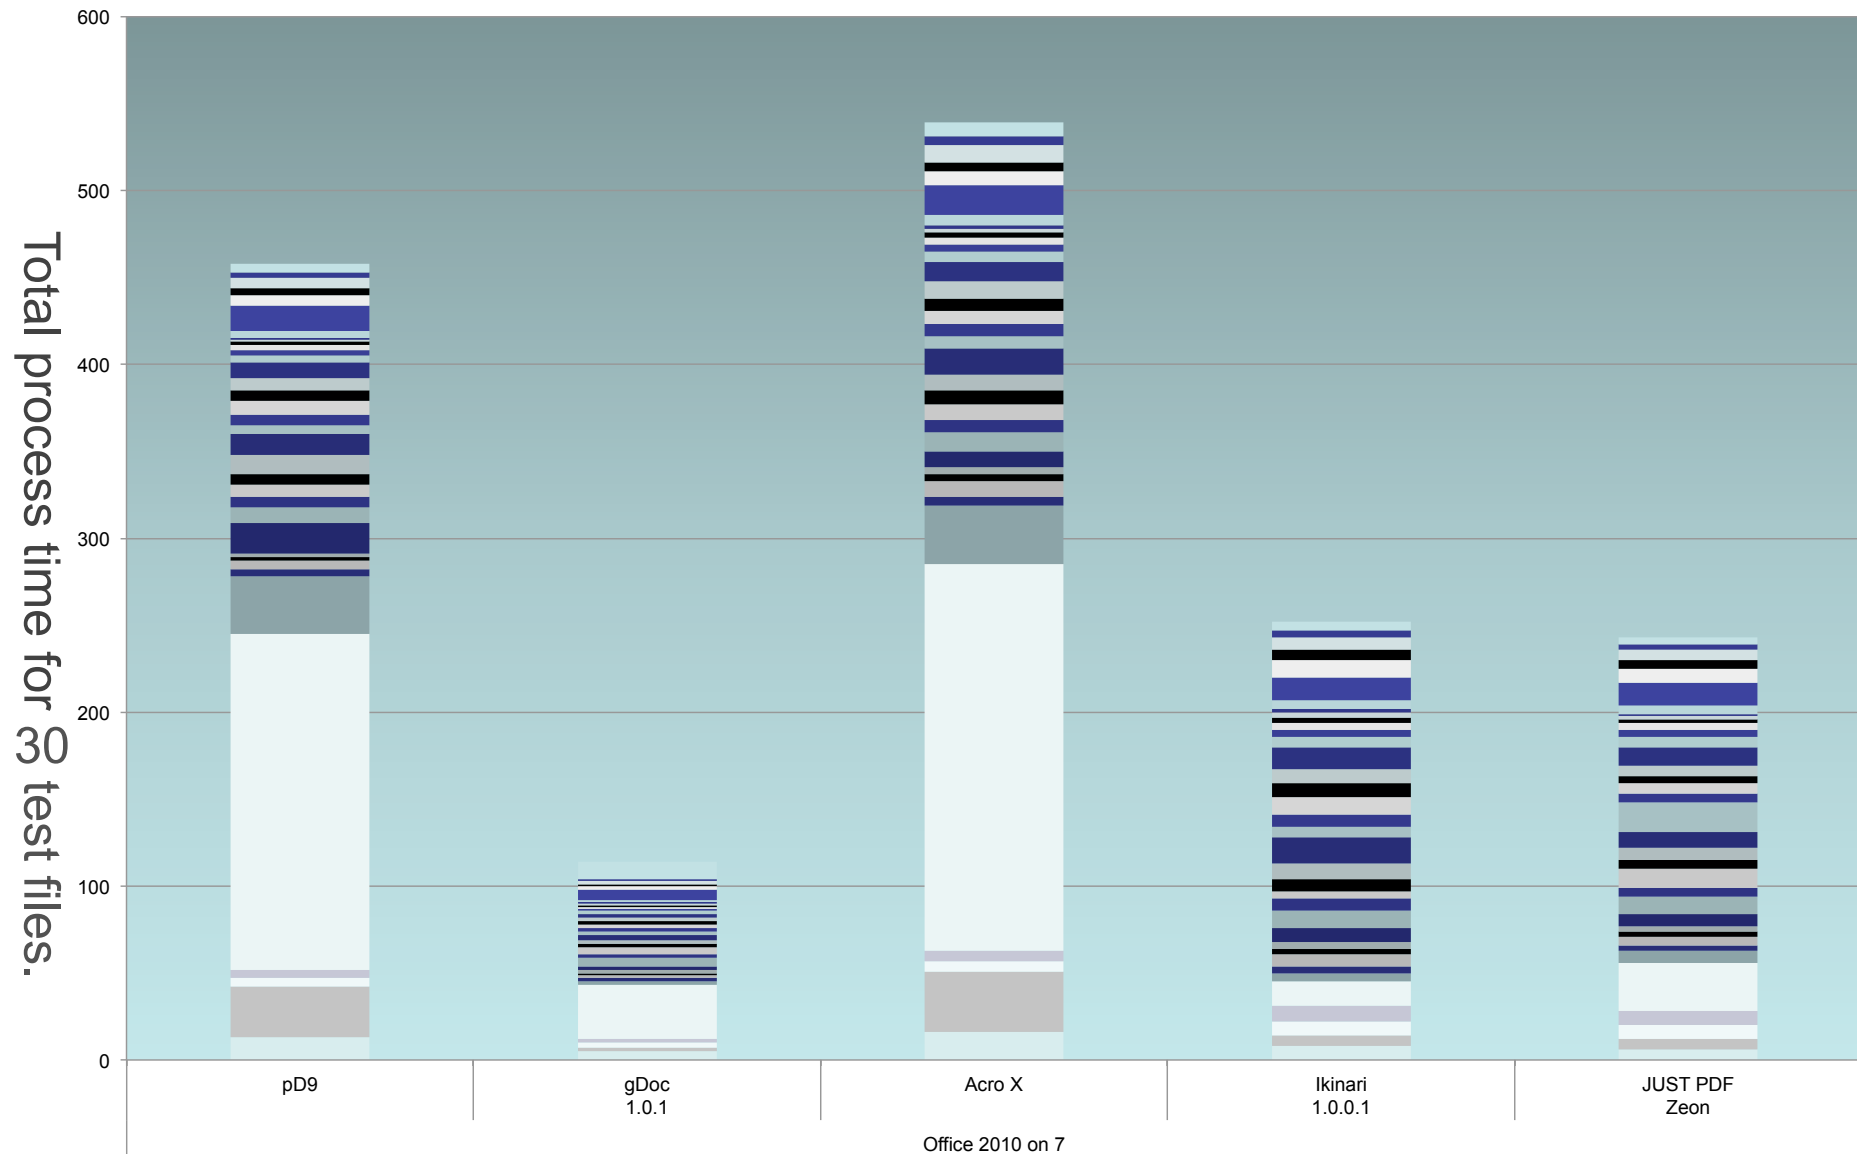

Suitable for integration into professional graphics applications

Support for Remote Desktop Services and virtualization

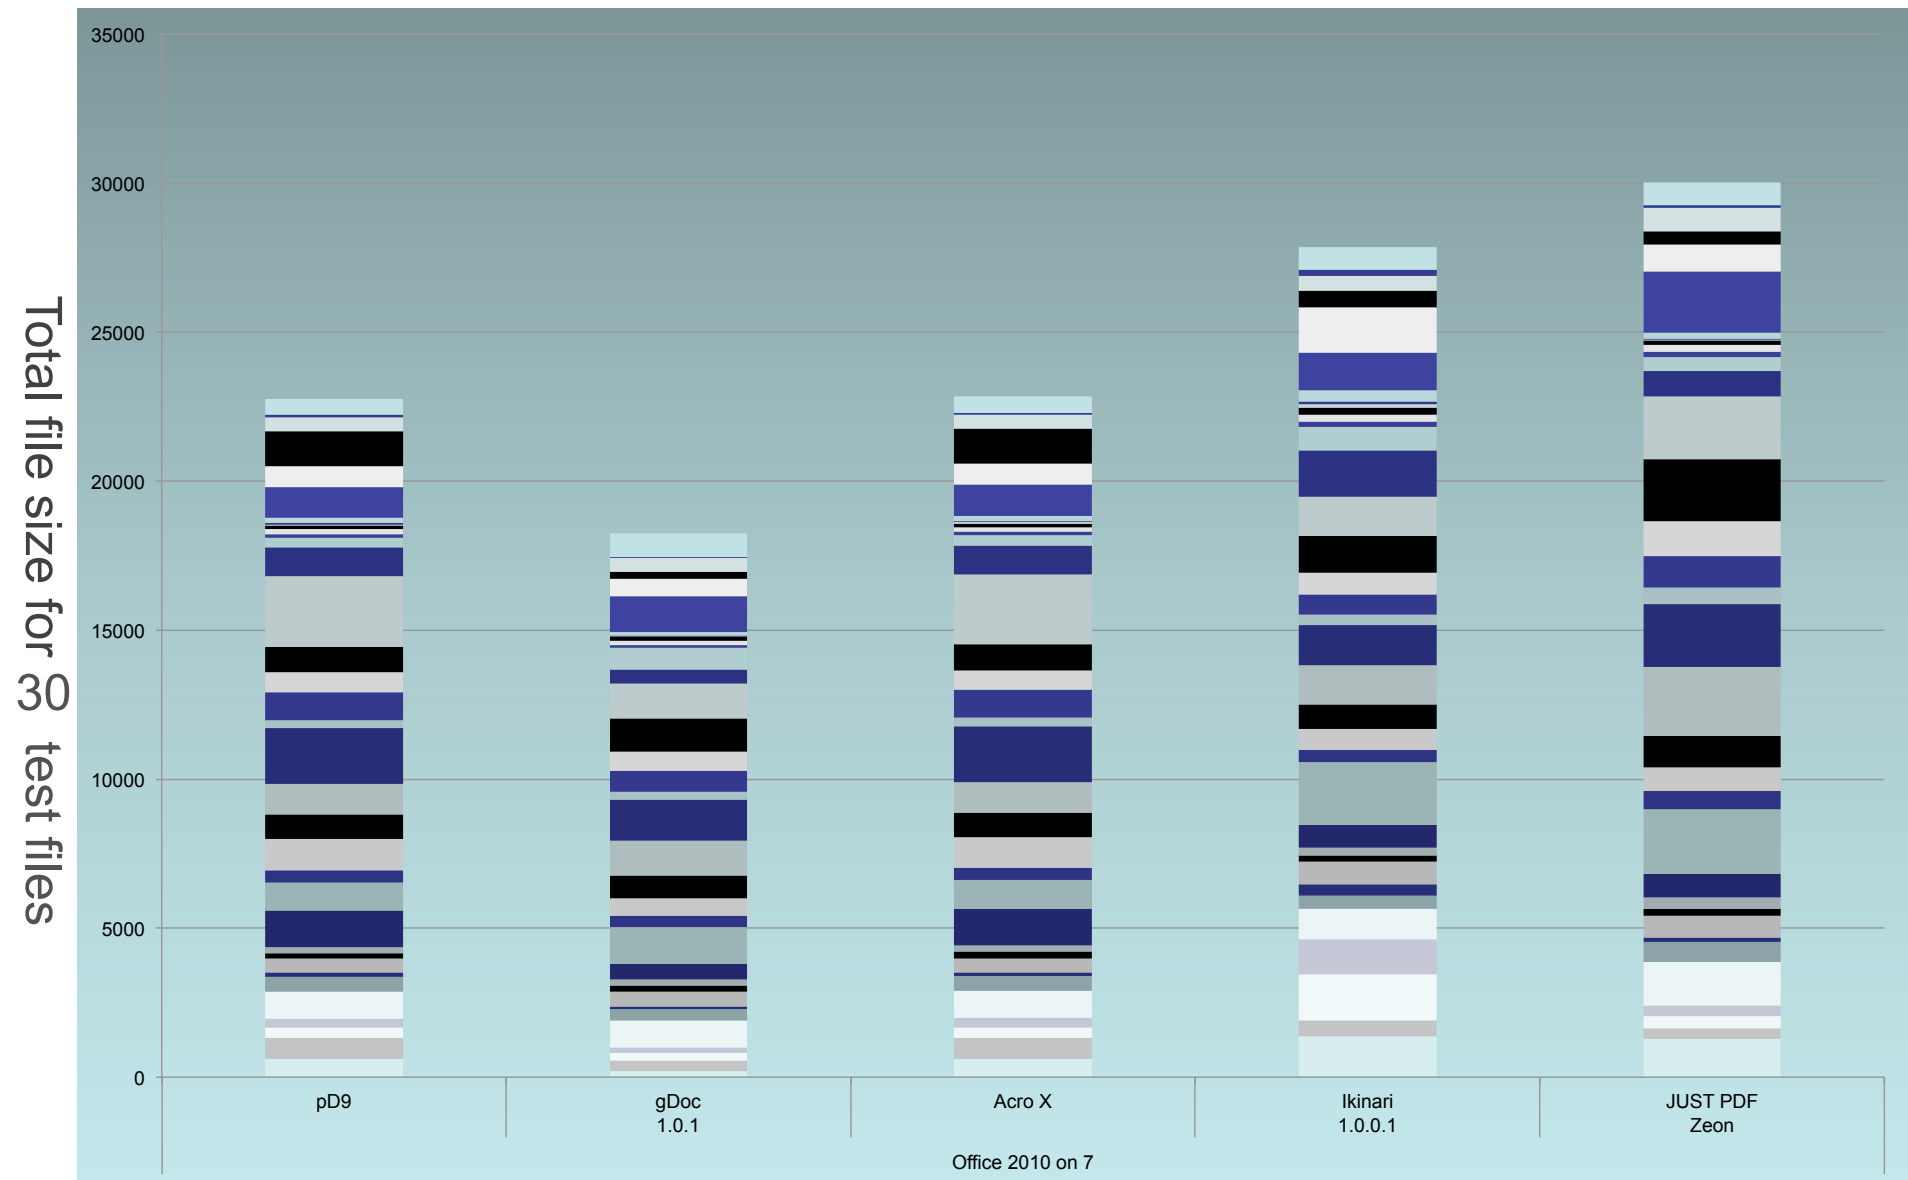

PDF printer driver runs on Citrix, Hyper-V, VMWare and many more

Verified as being faster, producing higher-quality conversions and with a smaller footprint across a selection of customer supplied test files than Adobe Acrobat X when converting documents into PDF from Microsoft Office.

# PDF 生成時間 (creation time)

# PDF ファイルサイズ (File size)

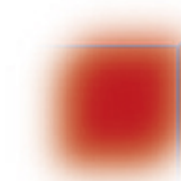

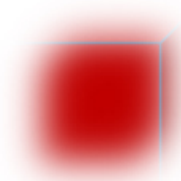

# PDF 品質 (Quality)

Total file size for 30 test files
